

What is Special Education?

The goal in special education is to use or modify the general education curriculum to meet each child's individual needs.

At Chelsea Public School We:

- Support students behaviorally socially, and academically.
- Provide appropriate accommodations when needed.
- Develop Individualized Education Programs (IEP) for each student receiving special education services. The IEP sets personalized goals for the student and is tailored to that student's individual needs and abilities.
- When appropriate, the program includes a transition plan outlining specific steps to prepare students for a job or postsecondary study.
